RADEN MAURIN

DATA ANALYST | BUSINESS SUPPORT OPERATION
Jakarta, Indonesia | +62 811-1802-594 | nedmaurin@gmail.com
Portfolio: Employee Attrition , Integrated Work Management System | LinkedIn: LinkedIn - Raden Maurin

About Me

I am a business operations professional transitioning into Data Analytics, bringing over 8 years of experience in project control, tender management, operational reporting, and stakeholder coordination within the Oil & Gas industry.
Throughout my career, I have worked with project and operational data to monitor performance, identify potential risks, track KPIs, and support management decision-making. To strengthen my analytical capabilities, I completed the Full Stack Data Analytics program at RevoU, where I worked on data cleaning, exploratory data analysis, and interactive dashboards using Python, SQL, and Tableau. I also developed an Integrated Work Management System (IWMS) as an academic project, integrating operational data with analytics capabilities across tender management, legal compliance, and equipment monitoring. I combine extensive business operations experience with data analytics skills to help organizations transform complex data into actionable insights, improve operational visibility, and support informed decision-making. My background in project management enables me to connect analytical findings to practical business needs and measurable opportunities for improvement.

Education

President University, Cikarang **2026**
Bachelor of Science — Information System (In Progress), Information System

IPB University, Bogor **2016**
Associate Degree — Computer Engineering, Computer Engineering

Informal Education

Full Stack Data Analysis RevoU **Sep 2026**

Working Experiences

Business Support Supervisor — Tender and Project | PT. Titis Sampurna Inspection **Jan 2022 - Mar 2026**

- Monitored project and tender portfolios with an approximate annual contract value of IDR 101 billion, consolidating operational information to support performance tracking, budget monitoring, and management reporting.
- Developed structured KPI tracking and progress reports to monitor project milestones, tender activities, and operational performance, supporting data-informed management decisions.
- Analyzed project risks, delays, and compliance issues to identify potential bottlenecks and recommend corrective actions across business, legal, and technical functions.
- Improved operational reporting workflows through structured data management and collaborative tools, including Monday.com, Notion, and ERP to enhance visibility and cross-functional coordination.

Project Management Consultant (PMC) — Project Document Engineer| Pertamina Patra Niaga **Aug 2020 - Jan 2022**

- Managed and organized project documentation for multi-site oil spill remediation and environmental management activities, ensuring consistent information tracking across project phases.
- Maintained structured document records, revision histories, and submission trackers to support data accuracy, traceability, and regulatory compliance.
- Consolidated documentation status and project progress information for reporting and coordination with project managers, engineers, and client stakeholders.
- Reviewed document completeness and identified outstanding submissions to support timely follow-up and project delivery.

ICT Support | PT. Titis Sampurna Inspection **Jun 2019 - Aug 2020**

- Supported enterprise systems and operational applications, assisting users with technical issues and maintaining business process continuity.
- Investigated and resolved application, networking, and system-related issues through structured troubleshooting.
- Assisted in improving system workflows and organizing operational information to support more consistent data management and reporting.

Project Administrator | Pertamina Hulu Energi ONWJ **Jul 2017 - Jun 2020**

- Supported project planning, budget monitoring, and progress tracking for commissioning activities in the upstream Oil & Gas sector.

- Prepared quarterly performance reports by consolidating project progress and operational information for management review.
- Monitored project milestones, documentation status, and outstanding action items to support timely project execution.
- Coordinated with engineering and project teams to maintain accurate reporting and improve visibility into project deliverables.

Skills

Hard Skills	Data cleaning & validation; exploratory analysis; KPI & performance reporting; relational data modeling; dashboarding; project controls; risk / delay / cost analysis; tender analytics; document & compliance analytics
Tools	SQL; Python; Streamlit; Supabase PostgreSQL; GitHub; Notion; Monday.com; ERP systems
Soft Skills	Stakeholder management; Domain Knowledge in Oil and Gas; cross-functional coordination; analytical problem solving; Business Communication;

Certifications

Data Quality with Python, Issued by DQLab	**Jan 2023**
